## 1. Introduction

This document captures the user stories and acceptance criteria for the Working Capital Portfolio Monitoring Dashboard.

The stories define how Credit Teams, Portfolio Managers, Relationship Managers, and Senior Management interact with the five-page Power BI dashboard to monitor Working Capital OD/CC portfolios.

The purpose of these user stories is to:

- Define user needs and monitoring expectations for each stakeholder group
- Capture dashboard interaction and KPI display requirements
- Support UAT validation and stakeholder sign-off
- Maintain traceability between business requirements and dashboard implementation

## 2. User Stories

| US-01 — View Portfolio Overview |                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Role                            | Credit Team Member or Portfolio Manager                                                                                                                                                                                                                                                                                                                                                                              |
| I want to                       | View a consolidated portfolio overview with key KPIs                                                                                                                                                                                                                                                                                                                                                                 |
| So that                         | I can assess the overall health of the Working Capital OD/CC portfolio at a glance                                                                                                                                                                                                                                                                                                                                   |
| Acceptance Criteria             | <ul style="list-style-type: none"><li>• Dashboard Page 1 displays Total Customers, Total Sanctioned Amount, Total Utilized Amount, and Utilization %</li><li>• Total SMA Accounts and Total NPA Accounts are displayed with correct counts</li><li>• KPI values match validated SQL query outputs</li><li>• Dashboard data is refreshed daily</li><li>• All KPI cards display without errors after refresh</li></ul> |

### 4. Conclusion

The user stories define the key interaction and monitoring requirements for each stakeholder group using the Working Capital Portfolio Monitoring Dashboard.

All nine user stories are directly mapped to the implemented Power BI dashboard pages — Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export — and traced to their corresponding functional and non-functional requirements.

These stories support UAT planning, stakeholder review, and final dashboard sign-off.
