

KPI DEFINITION DOCUMENT

Working Capital Portfolio Monitoring Dashboard

Prepared By	Business Analyst
Version	1.0
Date	June 2025

1. Introduction

This document defines the Key Performance Indicators (KPIs) used in the Working Capital Portfolio Monitoring Dashboard, covering OD/CC accounts.

The KPIs support:

- Portfolio-level monitoring across the five dashboard pages
- SMA and NPA identification
- Compliance tracking — stock statements, deferrals, and account churning
- Portfolio concentration analysis — product, industry, segment, and RM-wise

The KPI framework forms the foundation for:

- SQL Server — KPI queries and portfolio monitoring queries
- Power BI — five-page dashboard reporting (Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, Data Export)

2. KPI Objectives

The KPI framework is designed to:

- Provide centralized portfolio visibility for all OD/CC accounts
- Enable early identification of SMA and NPA accounts
- Monitor credit utilization at portfolio level
- Track compliance — stock statements, deferral documents, and account churning
- Analyse portfolio concentration by product, industry, segment, and RM
- Reduce manual MIS preparation through standardized, SQL-driven KPI logic

3. KPI Definition Structure

Each KPI includes:

Field	Purpose
KPI Name	Name of the KPI as displayed on the dashboard
Business Purpose	Why the KPI matters for portfolio monitoring
Logic / Formula	High-level SQL calculation logic
Threshold / Condition	Monitoring condition applied (where applicable)
Data Source	Source table(s) in SQL Server
Dashboard Usage	Dashboard page and visualization type

4. KPI Definitions — Page 1: Portfolio Overview

KPI-01 — Total Customers	
Business Purpose	Provide the total count of unique customers in the OD/CC portfolio

Logic	Count of distinct Customer IDs in Customer Master with an active Loan Account
Threshold	Not applicable — informational KPI
Data Source	Customer Master, Loan Account
Dashboard Usage	Page 1 — KPI Card

KPI-02 — Total Sanctioned Amount	
Business Purpose	Show total sanctioned exposure across the OD/CC portfolio
Logic	Sum of sanctioned limit across all active accounts in Loan Account
Threshold	Not applicable — informational KPI
Data Source	Loan Account
Dashboard Usage	Page 1 — KPI Card

KPI-03 — Total Utilized Amount	
Business Purpose	Show total drawn / utilized exposure across the portfolio
Logic	Sum of outstanding balance from Utilization Daily for the latest available date
Threshold	Not applicable — informational KPI
Data Source	Utilization Daily
Dashboard Usage	Page 1 — KPI Card

KPI-04 — Utilization %	
Business Purpose	Indicate overall portfolio utilization level
Logic	$(\text{Total Utilized Amount} \div \text{Total Sanctioned Amount}) \times 100$
Threshold	Not applicable — informational KPI
Data Source	Loan Account, Utilization Daily
Dashboard Usage	Page 1 — KPI Card

KPI-05 — Total SMA Accounts	
Business Purpose	Identify accounts showing early signs of stress (SMA-0/1/2)
Logic	Count of accounts where Overdue Status indicates SMA classification
Threshold	Overdue days as per SMA classification rules
Data Source	Overdue Status, Loan Account
Dashboard Usage	Page 1 — KPI Card

KPI-06 — Total NPA Accounts	
Business Purpose	Identify accounts that have slipped into NPA
Logic	Count of accounts where Overdue Status indicates NPA classification
Threshold	Overdue beyond 90 days as per NPA classification norms
Data Source	Overdue Status, Loan Account

5. KPI Definitions — Page 3: Risk & Compliance

KPI-07 — High Utilization Accounts

Business Purpose	Identify accounts operating close to their sanctioned limit
Logic	Count of accounts where $(\text{Utilized Amount} \div \text{Sanctioned Limit}) \geq$ defined high utilization threshold
Threshold	Utilization $\geq$ 90% (configurable)
Data Source	Loan Account, Utilization Daily
Dashboard Usage	Page 3 — KPI Card

KPI-08 — Low Utilization Accounts

Business Purpose	Identify underutilized facilities — potential for limit review
Logic	Count of accounts where $(\text{Utilized Amount} \div \text{Sanctioned Limit}) \leq$ defined low utilization threshold
Threshold	Utilization $\leq$ 20% (configurable)
Data Source	Loan Account, Utilization Daily
Dashboard Usage	Page 3 — KPI Card

KPI-09 — Pending Stock Statements

Business Purpose	Track accounts with overdue stock statement submissions
Logic	Count of accounts in Stock Statement where submission status = Pending and due date has passed
Threshold	Submission overdue beyond agreed periodicity
Data Source	Stock Statement
Dashboard Usage	Page 3 — KPI Card

KPI-10 — Deferral Accounts

Business Purpose	Track accounts with pending deferral documents
Logic	Count of accounts in Deferral Documents where deferral status = Pending
Threshold	Deferral period exceeded
Data Source	Deferral Documents
Dashboard Usage	Page 3 — KPI Card

KPI-11 — Non-Churning Accounts

Business Purpose	Identify accounts with low or no transaction activity — early warning indicator
Logic	Count of accounts in Account Churning where transaction activity falls below defined threshold over the monitoring period

Threshold	No significant credit/debit movement over defined period
Data Source	Account Churning
Dashboard Usage	Page 3 — KPI Card

6. KPI Definitions — Page 4: Portfolio Analytics

KPI-12 — Product-wise Sanctioned Amount	
Business Purpose	Show portfolio distribution across Working Capital products (OD, CC, etc.)
Logic	Sum of sanctioned amount grouped by Product ID from Product Master
Threshold	Not applicable — analytical KPI
Data Source	Product Master, Loan Account
Dashboard Usage	Page 4 — Bar Chart

KPI-13 — Industry-wise Concentration	
Business Purpose	Identify industry-level concentration risk in the portfolio
Logic	Sum of sanctioned amount grouped by Industry ID from Industry Master
Threshold	Not applicable — analytical KPI
Data Source	Industry Master, Loan Account
Dashboard Usage	Page 4 — Pie / Donut Chart

KPI-14 — Segment-wise Sanctioned Amount	
Business Purpose	Show portfolio distribution across customer segments
Logic	Sum of sanctioned amount grouped by Segment ID from Segment Master
Threshold	Not applicable — analytical KPI
Data Source	Segment Master, Loan Account
Dashboard Usage	Page 4 — Bar Chart

KPI-15 — RM-wise Portfolio Distribution	
Business Purpose	Show portfolio size and exposure managed by each Relationship Manager
Logic	Sum of sanctioned amount grouped by RM ID from RM Master
Threshold	Not applicable — analytical KPI
Data Source	RM Master, Loan Account
Dashboard Usage	Page 4 — Bar Chart / Table

7. KPI Definitions — Page 2: RM Workbench

KPI-16 — Renewal Pipeline by Bucket	
Business Purpose	Give Relationship Managers visibility into upcoming and pending renewals grouped by due-

	date bucket
Logic	Count of accounts in Renewal_Details grouped by days-to-renewal bucket, filtered to the RM's own accounts
Threshold	Buckets defined by days remaining to Renewal_Due_Date; excluded once Renewal_Status = Completed
Data Source	Renewal_Details, Loan_Account_Table
Dashboard Usage	Page 2 — Bar Chart

KPI-17 — Renewal Action List	
Business Purpose	Provide a detail-level list of pending renewals for follow-up
Logic	Row-level list of accounts in Renewal_Details where Renewal_Status = Pending
Threshold	Not applicable — detail table
Data Source	Renewal_Details, Loan_Account_Table, Customers_Table
Dashboard Usage	Page 2 — Detail Table

KPI-18 — Interest Servicing – Payment Status	
Business Purpose	Identify accounts with overdue or unserviced interest payments
Logic	Row-level list of accounts in Interest_servicing where Serviced_Date is after Due_Date or is null
Threshold	Serviced_Date > Due_Date, or Serviced_Date is blank
Data Source	Interest_servicing, Loan_Account_Table, Customers_Table
Dashboard Usage	Page 2 — Detail Table

8. KPI Definitions — Page 5: Data Export

KPI-19 — Portfolio Detail – Full Account Extract	
Business Purpose	Provide a single, filterable, exportable account-level detail table for all users
Logic	Wide row per Account_ID combining sanctioned/utilized amounts, DPD, SMA category, RM, industry, and segment
Threshold	Not applicable — export table
Data Source	Loan_Account_Table, Customers_Table, Overdue_status, RM_Master, Industry_Master, Segment_Master
Dashboard Usage	Page 5 — Detail Table

9. Dashboard Usage of KPIs

Dashboard Page	KPIs
Page 1 — Portfolio Overview	KPI-01 to KPI-06
Page 3 — Risk & Compliance	KPI-07 to KPI-11
Page 4 — Portfolio Analytics	KPI-12 to KPI-15
Page 2 — RM Workbench	KPI-16 to KPI-18
Page 5 — Data Export	KPI-19

The dashboards support:

- KPI cards for headline metrics
- Bar charts, pie/donut charts for concentration analysis
- Filtering and drill-down by product, industry, segment, and RM
- Daily refresh aligned with source system batch updates

10. KPI Validation Approach

The KPI calculations are validated through:

- Business rule discussions with Credit Team and Portfolio Managers
- SQL-based validation queries — verifying calculation logic against raw source tables
- Dashboard reconciliation — comparing Power BI KPI values against SQL query outputs
- Stakeholder review sessions before go-live

This ensures KPI accuracy and consistency across reporting.

11. Assumptions & Dependencies

Assumptions

- Source system data (Flexcube, LaserSoft, EWS) is available and loaded into SQL Server
- Utilization, SMA/NPA, and compliance thresholds are approved by the Credit Team
- Daily refresh schedule supports portfolio monitoring needs

Dependencies

- Flexcube, LaserSoft, and EWS data integration into SQL Server
- SQL query development and validation for all 19 KPIs
- KPI business rule finalization (utilization thresholds, SMA/NPA classification)
- Power BI dashboard implementation across all five pages

12. Conclusion

The KPI framework supports centralized Working Capital portfolio monitoring through 19 KPIs spread across five Power BI dashboard pages — Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export.

Each KPI is backed by SQL Server queries on validated source tables, ensuring accuracy and consistency across the dashboard.

The KPIs help credit teams, portfolio managers, and senior management proactively monitor portfolio health, compliance status, and concentration risk with a standardized, daily-refreshed view.
