

DATA MAPPING DOCUMENT

Working Capital Portfolio Monitoring Dashboard

Prepared By	Business Analyst
Version	1.0
Date	June 2025

1. Introduction

This document defines the data mapping structure for the Working Capital Portfolio Monitoring Dashboard, covering OD/CC accounts.

The document explains:

- Source systems used
- Source-to-target field mapping across all 13 source tables
- Transformation logic for KPI calculations
- Dashboard usage of mapped data
- Validation rules for reporting consistency

The data mapping process supports:

- SQL Server table design and KPI queries
- Power BI dashboard reporting across five pages
- SMA/NPA, utilization, and compliance monitoring logic
- Portfolio concentration analysis

2. Objectives

The purpose of the data mapping activity is to:

- Standardize data from Flexcube, LaserSoft, and EWS into SQL Server
- Support KPI calculations for all 19 dashboard KPIs
- Improve data consistency and validation across source tables
- Enable centralized portfolio monitoring across five dashboard pages
- Support SMA/NPA classification and compliance tracking

3. Source Systems

Source System	Purpose
Flexcube (Core Banking)	Account balances, sanctioned limits, utilization, and overdue data
LaserSoft	Stock statement, deferral, and collateral documentation
EWS (Early Warning Systems)	Account churning and early warning indicators

4. Data Mapping Table

Mapping ID in blue | Source Table in teal | KPI Usage colour-coded: green = Page 1, orange = Page 3, blue = Page 4, purple = All Pages

Mapping ID	Source Table	Source Field	Target Field	Transformation / Logic	KPI Usage
MAP-01	Customer Master	CUSTOMER_ID	Customer ID	Direct Mapping	KPI-01 — Total Customers
MAP-02	Customer Master	CUSTOMER_NAME	Customer Name	Direct Mapping	Portfolio identification
MAP-03	Segment Master	SEGMENT_ID	Segment ID	Direct Mapping	KPI-14 — Segment-wise Sanctioned
MAP-04	Segment Master	SEGMENT_NAME	Segment Name	Direct Mapping	KPI-14 — Segment-wise Sanctioned
MAP-05	Industry Master	INDUSTRY_ID	Industry ID	Direct Mapping	KPI-13 — Industry-wise Concentration
MAP-06	Industry Master	INDUSTRY_NAME	Industry Name	Direct Mapping	KPI-13 — Industry-wise Concentration
MAP-07	RM Master	RM_ID	RM ID	Direct Mapping	KPI-15 — RM-wise Distribution
MAP-08	RM Master	RM_NAME	RM Name	Direct Mapping	KPI-15 — RM-wise Distribution
MAP-09	Product Master	PRODUCT_ID	Product ID	Direct Mapping	KPI-12 — Product-wise Sanctioned
MAP-10	Product Master	PRODUCT_NAME	Product Name	Direct Mapping	KPI-12 — Product-wise Sanctioned
MAP-11	Loan Account	ACCOUNT_NUMBER	Account Number	Direct Mapping	Primary key — all KPIs
MAP-12	Loan Account	SANCTION_LIMIT	Sanctioned Amount	Direct Mapping	KPI-02 — Total Sanctioned Amount
MAP-13	Loan Account	CUSTOMER_ID	Customer ID (FK)	Direct Mapping	Links to Customer Master
MAP-14	Loan Account	PRODUCT_ID	Product ID (FK)	Direct Mapping	Links to Product Master
MAP-15	Loan Account	RM_ID	RM ID (FK)	Direct Mapping	Links to RM Master
MAP-16	Loan Account	UTILIZED_AMOUNT	Utilized Amount	Direct Mapping (latest date)	KPI-03 — Total Utilized Amount
MAP-17	Loan Account	UTILIZATION_DATE	Utilization Date	Date formatting	Refresh tracking
MAP-18	Overdue Status	OVERDUE_DAYS	Overdue Days	Direct Mapping	KPI-05, KPI-06 — SMA/NPA
MAP-19	Overdue Status	ACCOUNT_NUMBER	Account Number (FK)	Direct Mapping	Links to Loan Account
MAP-20	Stock Statement	SUBMISSION_STATUS	Stock Statement Status	Direct Mapping	KPI-09 — Pending Stock Statements
MAP-21	Stock Statement	DUE_DATE	Submission Due Date	Date formatting	KPI-09 — Pending Stock Statements
MAP-22	Deferral Documents	DEFERRAL_STATUS	Deferral Status	Direct Mapping	KPI-10 — Deferral Accounts
MAP-23	Account Churning	LAST_TRANSACTION_DATE	Last Transaction Date	Date formatting	KPI-11 — Non-Churning Accounts
MAP-24	Account Churning	TRANSACTION_COUNT	Transaction Count	Direct Mapping	KPI-11 — Non-Churning Accounts
MAP-25	Renewal Details	RENEWAL_DUE_DATE	Renewal Due Date	Date formatting; bucketed by days remaining	KPI-16 — Renewal Pipeline by Bucket
MAP-26	Renewal Details	RENEWAL_STATUS	Renewal Status	Direct Mapping; excluded once Completed	KPI-17 — Renewal Action List
MAP-27	Interest Servicing	SERVICING_STATUS	Interest Servicing Status	Direct Mapping	KPI-18 — Interest Servicing Payment Status
MAP-28	Interest Servicing	ACCOUNT_NUMBER	Account Number (FK)	Direct Mapping	Links to Loan Account

5. Key Transformation Logic

Transformation ID in blue | KPI Reference in teal

Transformation ID	Parameter	Transformation Logic	KPI Reference
TR-01	Total Sanctioned Amount	SUM(SANCTION_LIMIT) across active Loan Account records	KPI-02
TR-02	Total Utilized Amount	SUM(UTILIZED_AMOUNT) from Loan Account for latest date	KPI-03
TR-03	Utilization %	(Total Utilized Amount ÷ Total Sanctioned Amount) × 100	KPI-04
TR-04	SMA Classification	OVERDUE_DAYS between 1–90, categorised as SMA-0/1/2 per defined bands	KPI-05
TR-05	NPA Classification	OVERDUE_DAYS > 90	KPI-06
TR-06	High Utilization Flag	Account-level Utilization % ≥ 90%	KPI-07
TR-07	Low Utilization Flag	Account-level Utilization % ≤ 20%	KPI-08
TR-08	Pending Stock Statement Flag	SUBMISSION_STATUS = 'Pending' AND DUE_DATE < Current Date	KPI-09
TR-09	Deferral Pending Flag	DEFERRAL_STATUS = 'Pending'	KPI-10
TR-10	Non-Churning Flag	TRANSACTION_COUNT below defined threshold within monitoring period	KPI-11
TR-11	Product-wise Aggregation	SUM(SANCTION_LIMIT) grouped by PRODUCT_ID	KPI-12
TR-12	Industry-wise Aggregation	SUM(SANCTION_LIMIT) grouped by INDUSTRY_ID	KPI-13
TR-13	Segment-wise Aggregation	SUM(SANCTION_LIMIT) grouped by SEGMENT_ID	KPI-14
TR-14	RM-wise Aggregation	SUM(SANCTION_LIMIT) grouped by RM_ID	KPI-15
TR-15	Data Deduplication	Remove duplicate records using ACCOUNT_NUMBER as unique key	All KPIs
TR-16	Null Handling	Replace blank numeric fields with 0; blank status fields with 'Not Available'	All KPIs
TR-17	Dashboard Filter Standardization	Standardize Product, Industry, Segment, and RM filter values from Master tables	Page 4

6. Data Validation Rules

Validation ID	Validation Rule	Applicable Table(s)
VAL-01	ACCOUNT_NUMBER should not be null and must be unique	Loan Account
VAL-02	SANCTION_LIMIT and UTILIZED_AMOUNT should contain valid numeric values ≥ 0	Loan Account
VAL-03	OVERDUE_DAYS should be a valid non-negative integer	Overdue Status
VAL-04	All foreign keys (CUSTOMER_ID, PRODUCT_ID, RM_ID, INDUSTRY_ID, SEGMENT_ID) must exist in respective Master tables	Loan Account
VAL-05	SUBMISSION_STATUS and DEFERRAL_STATUS should contain only defined valid values (e.g. Pending, Submitted, Cleared)	Stock Statement, Deferral Documents
VAL-06	Dashboard should display data only after all 13 source tables are validated and refreshed	All Tables

7. Dashboard Data Usage

The mapped data supports:

- KPI calculations across all five dashboard pages
- Dashboard visualizations — KPI cards, bar charts, pie/donut charts
- SMA/NPA classification and utilization monitoring
- Compliance tracking — stock statements, deferrals, account churning
- Drill-down and filtering by product, industry, segment, and RM

The data is used across:

Dashboard Page	Data Tables Used
Page 1 — Portfolio Overview	Customer Master, Loan Account, Overdue Status
Page 3 — Risk & Compliance	Loan Account, Stock Statement, Deferral Documents, Account Churning
Page 4 — Portfolio Analytics	Product Master, Industry Master, Segment Master, RM Master, Loan Account
Page 2 — RM Workbench	Loan Account, Renewal Details, Interest Servicing
Page 5 — Data Export	Loan Account, Customer Master, Product Master, Industry Master, Segment Master, RM Master

8. Assumptions & Dependencies

Assumptions:

- Source system data from Flexcube, LaserSoft, and EWS follows consistent field formats
- All Master table values (Product, Industry, Segment, RM) are finalized before SQL development
- Dashboard fields are validated by Credit Team and Portfolio Managers before go-live

Dependencies:

- Flexcube, LaserSoft, and EWS data integration into SQL Server
- SQL query development for all 28 mappings and 17 transformations
- KPI and business rule finalization (utilization thresholds, SMA/NPA classification)
- Power BI dashboard implementation across all five pages

9. Conclusion

The Data Mapping Document defines how data from Flexcube, LaserSoft, and EWS is structured, transformed, and used across the Working Capital Portfolio Monitoring Dashboard.

The mapping structure supports:

- Standardized data processing across all 13 source tables
- KPI calculation logic for all 19 dashboard KPIs
- SQL-based validation before Power BI connection
- Centralized portfolio visibility across Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export

This ensures consistent and reliable data for Power BI reporting and proactive Working Capital portfolio monitoring.
