

BUSINESS REQUIREMENTS DOCUMENT (BRD)

Working Capital Portfolio Monitoring Dashboard

Prepared By	Business Analyst
Version	1.0
Date	June 2025

1. Introduction

Purpose

This document defines the business requirements, objectives, scope, and monitoring needs for the Working Capital Portfolio Monitoring Dashboard.

The solution is designed to improve monitoring of OD/CC portfolios through:

- Centralized Power BI dashboard reporting
- KPI-based portfolio analysis across three dashboard pages
- SQL-driven data consolidation from core banking systems
- Improved portfolio visibility and reduced manual MIS effort

Project Overview

The project focuses on improving Working Capital portfolio monitoring by integrating data from Flexcube (Core Banking), LaserSoft, and Early Warning Systems (EWS).

The solution uses:

- SQL Server — for data integration, table design, KPI queries, and portfolio monitoring queries
- Power BI — for five-page dashboard reporting covering Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export

The dashboard enables business and credit teams to monitor:

- Total portfolio exposure and credit utilization
- SMA and NPA accounts
- Stock statement submissions, deferral documents, and account churning
- Product-wise, industry-wise, segment-wise, and RM-wise portfolio distribution

2. Business Problem Statement

The current Working Capital monitoring process is manual and dependent on multiple disconnected systems — Flexcube, LaserSoft, and EWS. Business users extract reports manually, review accounts individually, and consolidate information using spreadsheets.

Key challenges:

- No centralized portfolio dashboard or consolidated view
- Delayed SMA and NPA identification due to manual cross-system validation
- Manual tracking of stock statements, deferrals, and renewals with no automated visibility
- Heavy dependence on Excel-based MIS preparation
- Inconsistent monitoring practices across Relationship Managers and branches
- No product-wise, industry-wise, or segment-wise portfolio visibility

3. Business Objectives

Objective ID	Business Objective	Addressed By
BO-01	Provide centralized portfolio visibility for all OD/CC accounts	Page 1 — Portfolio Overview
BO-02	Enable early identification of SMA and NPA accounts	Page 1 — SMA/NPA KPIs
BO-03	Improve compliance tracking for stock statements, deferrals, and renewals	Page 3 — Risk & Compliance; Page 2 — RM Workbench
BO-04	Monitor credit utilization — high and low utilization accounts	Page 3 — Utilization KPIs
BO-05	Analyse portfolio concentration by product, industry, segment, and RM	Page 4 — Portfolio Analytics
BO-06	Reduce manual MIS preparation effort	SQL + Power BI daily refresh
BO-07	Standardize portfolio monitoring KPIs across teams and branches	Consistent KPI logic in SQL

4. Project Scope

In Scope

- Working Capital OD/CC portfolio monitoring
- SQL Server database design — 13 source tables, KPI queries, and portfolio monitoring queries
- Power BI dashboard — five pages covering Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export
- Utilization monitoring, SMA/NPA tracking, compliance monitoring (stock statements, deferrals, churning)
- Product-wise, industry-wise, segment-wise, and RM-wise portfolio analysis
- Dashboard filtering and daily data refresh

Out of Scope

- Loan origination and credit appraisal
- Customer onboarding and KYC
- Collections and recovery management
- Core banking transaction processing
- Retail loan monitoring
- Automated alerts and role-based access control

5. Key Stakeholders

Stakeholder	Role in Project
Credit Team	SMA/NPA monitoring, compliance tracking, KPI validation
Portfolio Manager	Portfolio performance and concentration analysis
Relationship Manager	Account-wise utilization and customer health monitoring
Operations Team	Stock statement and deferral tracking requirements
IT / BI Team	SQL Server development and Power BI dashboard build
Business Analyst	Requirement gathering, documentation, and stakeholder coordination
Project Manager	Project tracking and delivery coordination
Senior Management	Portfolio-level oversight and governance

6. Current State (AS-IS Summary)

The current Working Capital monitoring process depends on:

- Manual access to multiple disconnected systems — Flexcube, LaserSoft, and EWS
- Account-by-account review with no portfolio-level view
- Excel-based MIS consolidation and manual report preparation
- Manual tracking of stock statements, deferrals, and renewals

Key challenges:

- Fragmented systems — no consolidated data view
- Delayed SMA and NPA identification
- Heavy manual reconciliation effort
- No portfolio-level analytics (product, industry, segment, RM)
- Inconsistent monitoring across Relationship Managers and branches

7. Future State (TO-BE Summary)

The Working Capital Portfolio Monitoring Dashboard addresses all AS-IS gaps through:

- Consolidation of Flexcube, LaserSoft, and EWS data into a structured SQL Server database
- Five-page Power BI dashboard covering Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export
- Daily data refresh replacing manual MIS preparation
- Standardized KPI definitions applied consistently across all teams

Key improvements:

- Single consolidated portfolio view — all OD/CC accounts monitored in one place
- Automated SMA/NPA count with daily refresh
- Compliance tracking — stock statements, deferral accounts, non-churning accounts
- Product, industry, segment, and RM-wise concentration analysis
- Elimination of manual Excel-based MIS effort

8. Business Requirements

BR ID	Business Requirement	Priority	Addressed By
BR-01	Consolidate data from multiple source systems into a single database	Must Have	SQL Server — 13 source tables
BR-02	Structured data model with validated relationships	Must Have	SQL Server — Tables, PKs, FKs
BR-03	Validate source data before KPI reporting	Must Have	SQL — Data validation queries
BR-04	Centralized view of total portfolio exposure and utilization	Must Have	Page 1 — Portfolio Overview
BR-05	Identify SMA and NPA accounts across the portfolio	Must Have	Page 1 — Portfolio Overview
BR-06	Monitor credit utilization — high and low utilization accounts	Must Have	Page 3 — Risk & Compliance
BR-07	Track accounts with pending stock statement submissions	Must Have	Page 3 — Risk & Compliance

BR ID	Business Requirement	Priority	Addressed By
BR-08	Monitor accounts with pending deferral documents	Must Have	Page 3 — Risk & Compliance
BR-09	Identify accounts with low or no transaction activity	Must Have	Page 3 — Risk & Compliance
BR-10	Analyse portfolio distribution by product type	Should Have	Page 4 — Portfolio Analytics
BR-11	Monitor industry concentration across the portfolio	Should Have	Page 4 — Portfolio Analytics
BR-12	Analyse portfolio distribution by customer segment	Should Have	Page 4 — Portfolio Analytics
BR-13	Monitor portfolio distribution by Relationship Manager	Should Have	Page 4 — Portfolio Analytics
BR-14	Enable user filtering across portfolio dimensions	Should Have	Power BI — All Pages
BR-15	Ensure dashboard reflects current portfolio data daily	Must Have	Power BI — Scheduled Refresh
BR-16	Track renewal pipeline and pending renewals by Relationship Manager	Must Have	Page 2 — RM Workbench
BR-17	Monitor interest servicing payment status per account	Must Have	Page 2 — RM Workbench
BR-18	Provide a consolidated, exportable account-level extract for all users	Should Have	Page 5 — Data Export

9. Functional Requirements Summary

FR ID	Functional Requirement	Dashboard / SQL Implementation
FR-01	Source Data Integration	SQL Server — 13 source tables
FR-02	SQL Database Design	Tables, PKs, FKs, Relationships
FR-03	Data Validation	SQL — Validation queries
FR-04	Total Portfolio KPIs	Page 1 — Portfolio Overview
FR-05	SMA and NPA Monitoring	Page 1 — Portfolio Overview
FR-06	Utilization Monitoring	Page 3 — Risk & Compliance
FR-07	Pending Stock Statement Tracking	Page 3 — Risk & Compliance
FR-08	Deferral Account Tracking	Page 3 — Risk & Compliance
FR-09	Non-Churning Account Monitoring	Page 3 — Risk & Compliance
FR-10	Product-wise Portfolio Analysis	Page 4 — Portfolio Analytics
FR-11	Industry-wise Concentration Analysis	Page 4 — Portfolio Analytics
FR-12	Segment-wise Portfolio Analysis	Page 4 — Portfolio Analytics
FR-13	RM-wise Portfolio Distribution	Page 4 — Portfolio Analytics
FR-14	Dashboard Filtering	Power BI — All Pages
FR-15	Daily Data Refresh	Power BI — Scheduled Refresh
FR-16	Renewal Pipeline & Action List	Page 2 — RM Workbench
FR-17	Interest Servicing Monitoring	Page 2 — RM Workbench
FR-18	Account-Level Data Export	Page 5 — Data Export

10. Non-Functional Requirements Summary

NFR ID	Category	Requirement
NFR-01	Performance	Dashboard pages load within acceptable time
NFR-02	Data Accuracy	KPI values validated against SQL source data before go-live
NFR-03	Data Completeness	All 13 source tables populated before each refresh

NFR ID	Category	Requirement
NFR-04	Data Refresh	Daily refresh aligned with source system batch updates
NFR-05	Availability	Dashboard accessible during business hours
NFR-06	Reliability	Daily refresh executes consistently
NFR-07	Usability	Navigation, filters, and drill-down supported across all pages
NFR-08	Scalability	SQL model supports portfolio growth without restructuring
NFR-09	Data Retention	SQL Server retains historical data for future trend analysis
NFR-10	Export	Dashboard visuals exportable to Excel and PDF

11. Key Use Cases

UC ID	Use Case	Primary Actor	Dashboard Page
UC-01	View Portfolio Overview	Credit Team, Portfolio Manager	Page 1 — Portfolio Overview
UC-02	Monitor Risk and Compliance KPIs	Credit Team	Page 3 — Risk & Compliance
UC-03	View RM-wise Portfolio Distribution	Portfolio Manager, Branch Manager	Page 4 — Portfolio Analytics
UC-04	Analyse Portfolio Concentration	Portfolio Manager	Page 4 — Portfolio Analytics
UC-05	Export Dashboard Report	Business User, Senior Management	All Pages
UC-06	Senior Management Portfolio Review	Senior Management	Page 1 & Page 4
UC-07	Monitor Renewal & Interest Servicing	Relationship Manager	Page 2 — RM Workbench
UC-08	Export Account-Level Data	All Users	Page 5 — Data Export

12. Risks & Dependencies

Area	Description
Data Quality	Incomplete or inconsistent source data from Flexcube, LaserSoft, or EWS may affect KPI accuracy
Source System Dependency	Data availability dependent on batch updates from core banking systems
Stakeholder Dependency	KPI threshold validation and UAT require timely stakeholder participation
SQL-Power BI Dependency	Dashboard accuracy depends on SQL query validation before Power BI connection
Refresh Dependency	Dashboard data currency dependent on daily refresh schedule execution

13. Success Criteria

Success Criterion	Measure
Portfolio dashboard live and accessible	All five dashboard pages available with daily refresh
SMA and NPA accounts visible	Total SMA and NPA counts accurate on Page 1 after daily refresh
Compliance KPIs tracked	Stock statements, deferrals, and non-churning accounts monitored on Page 3
Portfolio concentration analysis available	Product, industry, segment, and RM-wise views live on Page 4
Manual MIS effort reduced	Dashboard replaces manual Excel-based MIS preparation

Success Criterion	Measure
KPI accuracy validated	All 19 KPIs validated against SQL source data before go-live

14. Conclusion

The Business Requirements Document defines the business needs, scope, objectives, and requirements for the Working Capital Portfolio Monitoring Dashboard.

The solution consolidates data from Flexcube, LaserSoft, and EWS into a structured SQL Server database and delivers portfolio monitoring through a five-page Power BI dashboard covering Portfolio Overview, RM Workbench, Risk & Compliance, Portfolio Analytics, and Data Export.

All 18 business requirements are implemented, covering total portfolio KPIs, SMA/NPA monitoring, compliance tracking, and concentration analysis — enabling credit teams, portfolio managers, and senior management to monitor the Working Capital OD/CC portfolio with improved visibility, consistency, and efficiency.
